

In 1916 the Russian scholar Jacob Linzbach invented a universal writing system, which he thought should be understandable to all people, regardless of their native tongue. Linzbach called his new language ‘Transcendental Algebra’.

Several sentences have been written in Linzbach’s language and translated into English:

- | | |
|---|--|
| 1. $(\frac{\dot{\Delta}\dot{\Delta}i\dot{\Delta}}{\Delta i\dot{\Delta}} + \frac{i\dot{\Delta}}{\dot{\Delta}}) \leq$ | The father and the brother are talking. |
| 2. $n(> \dot{I}) \sqcap -t$ | The giants are working without haste. |
| 3. $(\frac{i\dot{\Delta}(-\dot{\Delta}\dot{\Delta})}{(-\dot{\Delta}\dot{\Delta})}) \oslash = \boxtimes$ | The orphans are writing a letter. |
| 4. $(-n\dot{I}_1) \oslash -t = \dot{I}_2$ | It wasn’t us who wrote about you (sg.). |
| 5. $\boxtimes \sqrt{\oslash} -t = -\dot{\Delta}_3$ | It was not by her that the letter was written. |
| 6. $(\frac{\dot{\Delta}\dot{\Delta}i\dot{\Delta}}{\Delta i\dot{\Delta}}) -\heartsuit = \sqcap -$ | The father doesn’t like the work. |
| 7. $((> \dot{I}) - \heartsuit)^{\heartsuit} -t = \frac{\dot{\Delta}\dot{\Delta}i\dot{\Delta}}{i\dot{\Delta}}$ | The wicked giant ate the parents. |
| 8. $\dot{\Delta}_3^{-t}$ | She is not in a hurry. |

Assignment Translate into English:

1. $+$
2. $\frac{\dot{\Delta}\dot{\Delta}i\dot{\Delta}}{\Delta i\dot{\Delta}}$
3. $\dot{\Delta}$
4. $\dot{I}_3^t$
5. $\frac{\dot{\Delta}\dot{\Delta}i\dot{\Delta}}{\dot{\Delta}\dot{\Delta}}$
6. $\frac{i\dot{\Delta}}{i} \leq$
7. $n \frac{\dot{\Delta}\dot{\Delta}i\dot{\Delta}}{i\dot{\Delta}} \sqcap -t$
8. $(\frac{i\dot{\Delta}}{i} - \leq) \oslash = \frac{\dot{\Delta}\dot{\Delta}i\dot{\Delta}}{i\dot{\Delta}}$
9. $\dot{I}_2^{\sqrt{\leq}} + t$
10. $\boxtimes \sqrt{\heartsuit} -t = \frac{i\dot{\Delta}}{i} - \heartsuit$
